

# Reviving hirabaru.org

IJ

Kazu Yamamoto

5 yeas ago,  
Hirabaru-san passed away  
without telling any passwords  
to anybody

The PC for hirabaru.org  
was in his home

The PC was going to be broken

We quickly retrieved  
contents of `hirabaru.org`

At least, three files were broken

The PC never boots again

His family stopped using Internet  
service of IIJ

The global IP address was returned  
to IIJ

The IP address was re-allocated to  
another customer

The customer had troubles in  
receiving unnecessary DNS packets

We don't know the password  
to administrate `hirabaru.org`

We asked Network Solutions to transfer

We sent a certificate of death  
which Netsol requires

But Netsol refused the transfer  
without clear reasons

We waited for the expire date  
in the next year

But `hirabaru.org` was renewed  
for one more year

We don't know who paid the fee

Renewal was repeated four times

hirabaru.org was expired  
in last July finally

WIDE Project obtained  
hirabaru.org  
and is now hosting it

hirabaru.org is revived now!
